This unique session focuses on robbery awareness, the requirements of the Bank Protection Act and the industry standards for robbery prevention. The Board of Directors must ensure there is a written security program for all branches and that robbery, burglary, and larceny training has been completed. To achieve this, the bank needs a risk manager who knows why robbers chose one location over another; is educated on the latest training techniques; and can perform physical risk assessments, including camera locations, barriers to criminals, and how staff can use customer service techniques to hinder potential robbers.

This webinar will meet the training requirements for your entire staff. Educating everyone from the boardroom to the frontline on robbery preparedness might be the best investment you ever make.

Continuing Education: Attendance verification for CE credits provided upon request.
